

“Online Open Innovation Platforms Versus Classic Networks How Do They Coexist And Where Are The Trends?”

Final Conference Interreg Europe Project INKREASE

<https://www.interregeurope.eu/inkrease/>

The Interreg Europe **project INKREASE** aimed at increasing the capacities of the various innovation ecosystems, reinforcing the collaboration between research and business communities and exploiting the economic valorization processes of research results.

After 4 years of mutual learning, translating new knowledge into regional policy instruments and implementing concrete actions in the participating regions it is time to share the results and draw conclusions!

We warmly invite you to join us at the **INKREASE final event** to discuss with us how to enlarge the critical mass of innovation ecosystems, how to increase the cooperation between science and industry and which form of networks or online platforms are most effective for finding new collaborative solutions.
