ABOUT THE PROJECT

The project aims at enhancing the efficiency and impact of Cohesion Policy and regional programme management through the integration of advanced data-driven decision-making and artificial intelligence tools. The project addresses key challenges in programme implementation by improving daily operations, strategic planning, monitoring, and evaluation, ensuring smarter resource allocation and reducing regional disparities.

Events

Kick-off meeting

On 8-9 July 2025, SHARPEI partners gathered in Bologna — hosted by the Regione Emilia-Romagna — to launch our mission of integrating data and AI into regional policy management. Representatives from all eight partner regions participated in two days of engaging discussions, sharing and refining the SHARPEI work plan, exchanging experiences and best practices, and outlining the project's methodology, management structure, activities, and key deadlines.

Interreg Europe Training Days

Lead Partner - Emilia-Romagna Region attended the Interreg Europe Training Days held in Lille from 29 September to 2 October. Together with other lead partners from across Europe, the team explored key topics like financial management, reporting, and communication — essential elements for the effective implementation of the projects.
